

# *Washingtonia robusta*

## Cotton Palm

---

### Description

A hardy and fast growing palm with large fan-shaped fronds, native to Mexico. Similar to Livistona but with a stouter trunk

### Size

Medium to tall

Maximum height: 15 to 20 metres

Maximum spread: 2 to 4 metres

### Features

- Hardy and adaptable to a wide range of soils and climates
- Retains its fronds as it ages

### Uses

- Avenue or feature tree
- Coastal tolerant
- Drought tolerant when established

### Preferred conditions

Full sun to partial shade. Adaptable to most soils. Prefers moisture.
