waste avoidance & resource recovery – commercial services

Waverley Council

Commercial Services

Working with You

Commercial Services at Waverley Council provides a range of commercial waste and recycling services to suit your needs.

Waste services

Mobile Garbage Bins

We can provide one or more 140, 240 or 660 litre mobile garbage bins for use at your premises. Depending on your requirements and location, we offer up to 7 days a week collection service. Bins must be placed at the kerbside the night before the collection day(s) arranged with our Commercial Services Section, and removed immediately after collection. Invoices are issued quarterly in advance, or a monthly payment option can be negotiated.

Blue Bags

If you produce waste in quantities too small to require a mobile garbage bin, we can provide pre-paid blue bags. These bags are not for food waste or recyclables. Bags must be placed at the kerbside the night before the collection day arranged with our Commercial Services Section. Additional bags can be purchased as required.

Recycling Services

Our Commercial Services Section provides you with a Blue Bin for paper and cardboard, and a Yellow Lid Bin for recyclable containers including glass bottles & jars, plastics , aluminium and steel: cans, pots & pans. Plastic bags, waxed cardboard and styrofoam are not collected.

Additional Collections

Our Commercial Services Section can provide additional collections as required. Costs incurred will be added to your quarterly invoice.

Bin Cleaning Service

Your bins are pressure cleaned, dried & deodorised. No mess, no fuss, and no water left behind. This service is provided on-site. Please ring for more information, or to make a booking.
