

Angophora hispida

Dwarf Apple

Description

An attractive native large shrub to small tree with profuse flowers in summer

Size

Small sized native tree. Upright to broad-domed in shape but variable

Height: 4 to 6 metres

Width: 3 to 5 metres

Pruning: some early shaping required to keep the tree single trunked and upright

Features

- Can have a twisted informal shape suitable for informal native gardens
- Very attractive reddish/purple new growth
- Profusion of large white flowers in late summer.

Uses

- Screening
- Feature tree
- Great food source for native wildlife
- Street tree for drier conditions

Preferred conditions

Prefers full sun in sandy well drained soils. Moderately coastal tolerant but prefers some protection from adjacent plants

Availability

Most nurseries specializing in natives. Randwick Community Nursery
