

# *Leptospermum laevigatum*

## Coastal Tea Tree

---

### Description

Grey green foliage and weeping habit when mature. Attractive white flowers in late winter early spring

### Size

Small native tree/large shrub

Maximum height: 2 to 4 metres

Maximum spread: 2 to 3 metres

Pruning: needs regular pruning to shape to tree form

### Features

- Useful large shrub to small tree
- Fast growing with a dense habit and a rounded crown when mature

### Uses

- Dense screening shrub/small tree as group plantings
- Suitable for native gardens
- Habitat for local wildlife
- Frontline coastal

### Preferred conditions

Full sun to partial shade.  
Adaptable to most soils.  
Tolerates dry periods but extra water improves appearance

### Availability

All nurseries
