

Tristaniopsis laurina

Watergum

Description

Native evergreen tree usually found on side of watercourses and streams

Size

Maximum height: 6 to 8 metres

Maximum spread: 4 to 6 metres

Features

Small perfumed yellow flowers in spring and smooth mottled grey bark

Uses

- Good tree for part shade
- Compact shade tree

Preferred conditions

Adaptable to full sun or part shade but prefers moisture. Moderate growth rate. Tolerates most soils if ample water is available

Availability

All nurseries

Cultivars

New cultivar 'Luscious' – has dark red tinges on upper bark and deep green glossy leaves
