Summary
Feedback on the Thomas Hogan Reserve Play Space Upgrade Concept was generally positive. The following feedback has been incorporated:

- Retain two trees identified for removal in the medium term and undertake some minor trimming of broken and dead branches which represent a risk to park users.
- Undertake succession planting of new native tree species before considering future tree removal.
- Include a drinking fountain in the upgrade works.
- Install consolidated signage at park entry on Francis Street, in accordance with Waverley’s Signage Strategy (subject to future funding).
- Incorporate information or representations of local flora and fauna into the play space as a fun education opportunity.

A consultation report, including a full record of all feedback received, is available on our website at:

- waverley.nsw.gov.au/building/current_projects

Council is reviewing opportunities to improve turf and bushland areas across the reserve as part of its regular maintenance plan. The community will be informed of any works that result from these investigations.

Next Steps
A detailed design will be prepared, followed by construction, which is currently scheduled for mid 2016.
