Waverley Council is incredibly proud of its Cemetery’s rich heritage and historical significance – it is the resting place of many people who helped shape Australia. Council is undertaking repair and maintenance works at the Cemetery in the coming months. Below you will find information on the current program of works and overleaf you will find a map detailing the location of each improvement.

**Fencing improvements**

**Internal fence**

We are working with a heritage expert who is providing advice on what type of internal fence options are suitable for the site. We will let you know when a decision is made and when the internal fencing will be installed. You will find the location of the internal fence improvements in the map overleaf.

**Fig Tree Lane fence**

Temporary work was done in June 2014 to replace the ‘orange tape’ on Trafalgar Street. We are now focusing our attention on Fig Tree Lane, where urgent work is required to replace the fence.

In mid March, two test panels will be installed on Fig Tree Lane. Each panel will be approximately 2.5 metres long, and will be made of recycled plastic. They will both be a picket fence style as we are replacing the existing fence along Fig Tree Lane with a similar style of fence using a durable material.

**Why two test panels?**

One test panel will be white; the other dark grey. This is so the Cemetery Working Group, which is made up of Council staff who work closely with the community, can decide which option best suits the site. We will let you know once a decision is made.

The chosen fence will be installed along the length of Fig Tree Lane (please see map overleaf for location).

**Is this a result of the fence consultation that occurred in 2013?**

In 2013 there was community consultation relating to the style of perimeter fencing that should be installed at Waverley Cemetery.

Consideration of a perimeter fence, including fence options that accommodate niches, was put on hold to allow us to consider options within the broader context of a vision for the Waverley Cemetery site and services.

We will work with the community to develop this vision, but our focus for the moment is to repair and maintain the Cemetery. Replacing the existing fence on Fig Tree Lane is an urgent repair and one of many improvements that will occur by June 2015.

**Will the chosen fencing for Fig Tree Lane eventually replace all perimeter fencing at the Cemetery?**

Council has not made a decision to replace all perimeter fencing with the chosen option for Fig Tree Lane.
If you have any questions, please contact Council’s Executive Manager, Clean and Attractive Waverley, John Hutcheson on 8306 3631.

If you would like to be sent regular email updates, please send an email requesting to be added to our Cemetery database to john.hutcheson@waverley.nsw.gov.au.

Our website www.waverley.nsw.gov.au will be updated with information on all the current improvements.
