Please note: Council does not recommend specific providers of local Strata Energy Services. Council does not accept liability in respect of any loss or damage resulting from reliance on advice provided by third party consultants on this list. This list is current as of July 2022 when the consultants responded to an Expression of Interest by Council. Community members should use their own discretion and inform themselves about the viability of the consultants by performing their own due diligence checks.

Strata Energy Service Consultants in Waverley

Waverley Council has committed to reach a Net Zero¹ greenhouse gas reduction target for the community by 2035.

Did you know that a total of 66% of Waverley residents live in apartments, which account for 35% of electricity consumption across the LGA?

By installing renewable energy and undertaking efficiency measures, strata buildings can save money and help to achieve net zero emissions for our community.

1. Net Zero target includes Scope 1, Scope 2 and some Scope 3 emissions (transport to work and waste)
