The South Bondi Toilet Building is currently undergoing important repair and refurbishment works. This fact sheet provides information on the upgrade.

**What do the works involve?**
- Increasing the number of female cubicles from three to seven
- Increasing the number of male cubicles from two to three, and the installation of a larger urinal
- Improving disabled and accessible facilities in both the male and female toilets
- The upgrade and relocation of the wash basins to outside underneath the columns at the front of the building (the colonnade)
- Repairs and painting of the concrete
- New paving surface and handrails around the roof
- New water and power saving fixtures.

**What will the building look like?**
The exterior of the building will look largely the same as the current building. Some elements, including the roof handrails, will be replaced or repaired with similar materials so the difference will not be noticeable and the wash basins will be relocated to outside under the columns at the front of the building. The storage area at the back of the building will be used to create more space inside the toilet block, which will mean it can accommodate more than double the number of toilets and new open changing space.

Fixtures and fittings will be replaced with more modern, sustainable and robust items.

**Who is carrying out the works?**
Sam Crawford Architects have designed the refurbishment and the works will be carried out by Axis Building Group and overseen by Council staff.

**Will the Coastal Walk be affected while the works are carried out?**
The Coastal Walk will not be affected and the stairs adjacent to the building will remain open during the works. Access from the stairs to the top path across Bondi Park to Queen Elizabeth Drive will be closed, but access to the bottom path across Bondi Park to Queen Elizabeth Drive will remain open.

**Will the toilets be available for use during the works?**
No. The closest available toilets are at Bondi Pavilion, approximately 600m north, or Marks Park, approximately 650m south along the Coastal Walk.

**When will the building be completed?**
Work is expected to be completed in September 2014.

**What will disruption be during the works phase?**
Council will work with the contractors to ensure there is minimal disruption while the works are carried out. People will still be able to use the Notts Ave footpath and the Coastal Walk stairs, while a small area around the building will be fenced off. Site signage will detail any local access restrictions.

The construction hours are 7am–4pm weekdays and 8am–1pm on Saturdays. Minimal noise is expected during construction and fit-out.

The contractors will work with traffic management staff to minimise the impact of any traffic interruptions.

**Who can I contact during the works?**
Contact Steve Gillett, Facilities Coordinator, on 9369 8166.
