Introduction and Background
This Consultation Report summarises feedback received from the Macpherson Park community consultation, which was undertaken in October 2014.

The findings of the consultation will help guide the proposed upgrades to the park and playground, which are scheduled for early 2015.

The existing playground caters primarily to younger children with traditional play structures that are nearing the end of their useful lives.

The Waverley Council Play Strategy has identified several potential upgrades that would better position Macpherson Park within Waverley’s play network. These upgrades include creating a neighbourhood level playground by providing diverse play experiences for a wider age range.

Project Planning and Consultation Process
To ensure upgrades meet community needs, community consultation was undertaken. The methodology for upgrading the park and playground is set out below.

Project Planning
In June 2014, council officers undertook a site assessment of the park to discuss the state of facilities and to identify maintenance issues. An opportunities / constraints study (Refer Appendix A) of the park, and a precedent study of other playgrounds (Refer Appendix B), were prepared to show potential directions for the park upgrades. From these studies three options for upgrading the playground were tested (Refer Appendix C). A preferred option was then chosen and developed (Refer Appendix D).

Consultation Process
Consultation was designed to canvas community responses to preliminary analysis and sketches and to inform the ongoing upgrade process by gaining a better understanding of:

- how people get to the park and how often they visit;
- how long they stay and what they do in the park; and
- what they like about the park and what they’d like to see in the future.

A consultation survey based on these objectives was made available on the Waverley Council ‘have your say’ website and distributed on a flyer to 400 letterboxes within a 200m radius of the park (Refer Appendix E). Surveys were also distributed at a Bronte Beach precinct meeting and at a consultation day in the park. A total of 33 survey responses were received: eleven online responses, eighteen flyer responses and three emails.

A consultation day was held in Macpherson Park on a Saturday, between 10am and 12pm. On the day two council officers staffed a station which included: a table, A3 laminated prints of the opportunities / constraints, precedents and sketch studies, paper surveys and balloons. The consultation day was promoted on the Waverley Council ‘have your say’ website, at a Bronte Beach precinct meeting and via the letterbox flyer drop. The consultation day was attended by approximately 25 members of the public.

Next Steps
The upgrade design will be modified, in light of the feedback received. The modified design will be displayed for information on the Waverley Council website, along with this report. A detailed design will then be prepared, followed by construction of the playground and park upgrades (currently scheduled for early 2015).
Consultation Feedback and Recommendations

In this section feedback, both written and verbal, is summarised into common themes. Each theme is accompanied by recommendations on how to incorporate the feedback into the upgrade works. A full table of written responses is located in Appendix F.

Current Use

Survey responses established that the park and playground are regularly used by local residents. Most visitors walk to the park and stay for a short period of up to one hour. The park is currently used for play, ball games, picnicking and relaxing. These findings support the playgrounds current classification as a pocket play space.

Proposed Upgrade

Feedback generally supported the proposed playground upgrade. Verbal feedback at the open day generally supported the proposed playground relocation, particularly the shade from the existing trees and the increased kick-around area. Some written responses suggested enhancing the existing playground location, through the inclusion of shade sails, fencing and new equipment.

A number of people valued the toddler-focused equipment in the existing playground and felt that the upgrade should accommodate a number of toddler play opportunities. These respondents also identified rubber as their preferred playground surface and raised hygiene concerns about mulch and sand surfaces.

Several respondents felt that junior children (5-9 years) were excluded from the existing playground and that new equipment should also encourage this age range. A desire for separation of older and toddler play activities was also a common response.

Recommendations:

- Relocate playground to area shaded by existing tree canopy
- Create a new playground that encourages use by both toddlers and junior children, as identified in the Play Strategy, by ensuring some
separation between these groups

• Provide rubber softfall in playground upgrade

Trees, Planting and Shade
The existing trees were widely recognized as a valuable part of the park, a source of shade and a suitable place to play. Verbal feedback generally supported proposed tree planting as a source of additional shade for the play area.

Increased shade cover over play equipment was a common request at the open day and in survey responses. Some people requested shade sails while others were unspecific about the type of shade.

Recommendations:
• Retain existing trees, subject to arborist assessment
• Ensure new tree planting does not obstruct playground usage
• Relocate playground and plant additional advanced trees to increase shade coverage
• Shade sails are not supported as the high installation and maintenance costs are not within current budget

Fencing
There was a strong view that fencing would improve park safety, particularly for toddlers and ball game users running on to Arden St. Some people suggested fencing extend around the perimeter of the park, while others suggested fencing, designed to stop balls running down the hill or buffer Arden St, would be sufficient.

Recommendations:
• Provide a barrier along the Arden St edge of the proposed playground to prevent direct conflict between children and fast moving traffic
• Reduce instances of balls running down the hill through placement of barrier, planting and playground equipment.
• Perimeter fencing is not supported as it encourages unsupervised play, reduces park permeability, discourages non-playground usage of the park, and is cost prohibitive

Park Access
The majority of respondents walk to the park and a significant number of these identified access hazards, particularly crossing Arden St. Multiple responses requested improved pedestrian access in general and several requested a priority pedestrian crossing on Arden St, at the Macpherson St intersection.

The proposed access path through the park was not commented on in survey responses or at the open day.

Recommendations:
• Improvements to pedestrian access at road crossings are outside the scope of this project but should be pursued as part of other projects, such as the Green Links project
• Review proposed path against upgrade budget and universal access objectives in the Play Strategy

Dogs
Macpherson Park is currently a dog on-lease area. Responses to dog use of the park was mixed. Some people listed dog walking, as activities they do in the park, while other requested the park be made dog free.

Recommendations:
• Council continue to monitor and manage dogs at Macpherson Park

Furniture
Activities such as sitting, resting, reading and picnicking were identified as popular activities. Several responses identified the existing picnic setting and shelter as a feature they wanted to retain.

Recommendations:
• Provide a combination of seating and picnicking opportunities for both playground and everyday park users

Parking
A number of people mentioned that parking was difficult for residents and there was some concern that an upgrade of the playground would make parking more difficult. Several people requested additional parking restrictions, particularly on Baglin St.

Recommendations:
• Report comments on parking to Council’s Traffic and Development Team
Appendices
OPPORTUNITIES AND CONSTRAINTS

Pedestrian access to the park is restricted by wide crossings and traffic flow on Mapheison St and Arden St. Improving access would better connect the park with the shops, Clovelly School and users to the north and west.

Park corner has long views to the ocean but feels exposed to traffic and cluttered with signage, which blocks views. Rationalising signage and planting trees would make the park feel bigger.

Trees on the north edge are intermittent and restricted by power lines. Supplemental tree planting would help define the park edge and increase shade.

Steep slope along north edge restricts pedestrian access into the park and presents an ongoing maintenance hazard.

Open kick-about area is useful for informal ball games. Relocating the existing playground out of this area would increase overall park usage.

Playground has some active equipment but is run down and has little shade. Relocating the playground amongst existing trees would increase shade cover.

Large trees frame the open area, provide shade and give the park a distinct woodland character.

Traffic on Arden St generates noise, but also provides surveillance into the park, which discourages anti-social behaviour.

Footpaths provide pedestrian access along two sides of the park. A path through the park to the playground would improve access for everyone.
IDEAS FOR NEW PLAYGROUND

MACPHERSON PARK AND PLAYGROUND

25 OCTOBER 2014

Lookouts are fun for older kids, especially when combined with other obstacles.

Mazes can be fun for kids of different ages.

Flexible climbing structures require greater balance and are good for older kids.

Rigid climbing structures help develop motor abilities and coordination.

Existing Trees

Proposed Tree

Playground

Proposed Playground

Existing Footpath

Proposed Link

Open Area

Park Corner

Steep Slope

Sound tubes and other elements can encourage experimenting with noise

Flat grass areas are good for ball games, scooters and learning to ride a bike.

Basket swings are fun for kids of different ages and physical abilities

Rubber surfaces can generate fun undulating shapes and withstand high use.

Natural elements provide a range of textures that stimulate the senses.

Sculptures can start made up games and encourage imagination and role play.

Shrubs can separate busy and quiet play areas and buffer surrounding uses like roads.

Slides are always popular in playgrounds with kids of most ages and abilities.

Mazes can be fun for kids of different ages.

Flexible climbing structures require greater balance and are good for older kids.

Rigid climbing structures help develop motor abilities and coordination.

Mazes can be fun for kids of different ages.

Flexible climbing structures require greater balance and are good for older kids.

Rigid climbing structures help develop motor abilities and coordination.

Mazes can be fun for kids of different ages.

Flexible climbing structures require greater balance and are good for older kids.

Rigid climbing structures help develop motor abilities and coordination.

Mazes can be fun for kids of different ages.

Flexible climbing structures require greater balance and are good for older kids.

Rigid climbing structures help develop motor abilities and coordination.
**PLAYGROUND LOCATION - OPTION 1**
- Lacks shade, and shade tree planting may be difficult as it could block ocean views for adjacent residents.
- Elevated location has good views but siting a playground could make other spaces in the park feel over-looked, which could discourage other users.
- Proximity to road provides good surveillance but also generates noise and risk of conflict between kids and cars, park would have to expand, through kerb extensions, to mitigate negative road issues.
- Corner location is the most accessible due to proximity to heavily use footpaths on Arden St and Macpherson St.
- Opportunity for active play, social play and free play to utilise views and landform.

**PLAYGROUND LOCATION - OPTION 2**
- Existing trees provide some shade, an opportunity for nature play and a distinct woodland experience.
- Location also provides opportunities for active, social and free play.
- Location is furthest from surrounding pedestrian movements, which will make providing universal access more expensive.
- Distance from surrounding streets and the slightly sunken location means playground should have an open design to ensure surveillance.
- Sloping topography means any play equipment either has to be narrow and run along contours, or work with slope, eg. flying fox.
- Location is on an overland flow path, which means layout, surfaces and planting need work with water movements.

**PLAYGROUND LOCATION - OPTION 3**
- Adjacent trees provide some shade.
- Sloping landform to the north could be modified to generate active play, eg. slides.
- Proximity of playground to field space compromises effectiveness of field for free play and use by non-playground users.
- Location is close to Baglin St, which means a short access path, but further from high pedestrian movements on Arden St to and from Clovelly School.
- Proximity of Macpherson St ensures moderate surveillance, but generates risk of conflict between kids and cars, which will necessitate planting and barrier, and makes playground feel ‘overlooked’.
**DRAFT PLAY CONCEPT**

The draft concepts shown on this page are a direct response to the site's opportunities and constraints. These ideas will be developed further following community input.

This draft concept relocates the playground amongst existing and new trees, creating a shaded, woodland play experience. Play elements have been selected and sited to encourage use from children of varying ages and abilities.

Materials will be mostly natural (timber and mulch), to compliment the woodland setting, with some bright colours and artificial surfaces to give contrast and ensure the playground withstands regular use.

An open layout will maintain sightlines from adjacent streets and discourage antisocial behaviour, especially at night.

---

**Tree and shrub planting** defines the edges of the play area, provides shade and keeps balls from running away.

**New path** improves access to the playground and can be used as a play element in circuits, by scooters and bikes, and as a hopscotch court.

**Basket swing** located close to path and grass area to make it accessible to wheelchairs and to consolidate active use on one side of the playground.

**Toddler play area** located under existing shade and partially separated from active play areas. Elements could include a maze, sound and nature play elements.

**Seating** located under existing shade trees, close to path and toddler area to encourage hands on play. Seating also separates the playground from Arden St, to buffer children from the road.

**Adventure course** for older kids; including balance beams, stepping stones and a lookout, with a slide.
We would like your ideas for an exciting new playground, which we are planning as part of a general upgrade to Macpherson Park.

HAVE YOUR SAY

Come along to Macpherson Park on Saturday 25 October, between 10am and 12pm, to share your ideas and comment on draft concept plans for the park and playground.

Or, fill out the survey on the back of this page and post it to:
Yanos Fill-Dryden, PO Box 9 Bondi Junction 1355

The personal information you provide in this survey will be used for research purposes only and will remain confidential. If there are any questions you don’t have a view about, please leave these sections of the survey blank. Feel free to attach pages or drawings if your thoughts don’t fit on this page.

1. How often do you visit Macpherson Park?
   ○ Daily ○ Weekly ○ Monthly ○ Never

2. How long do you spend in Macpherson Park?
   ○ 10 mins or less ○ 30 mins ○ 1 hour ○ 2 hours

3. How do you access Macpherson Park?
   ○ Walk ○ Bike ○ Bus ○ Car

4. What activities do you do in Macpherson Park?

5. What do you like most about Macpherson Park?

6. What would you like to see improved in Macpherson Park?

7. What is your age range?
   ○ <20 ○ 21-30 ○ 31-40 ○ 41-50 ○ 51-60 ○ 61-70 ○ 70+

8. If you visit with children, how many and how old are they?
   ○ 0-4 ○ 5-9 ○ 10-14 ○ 15-19 How Many: ____________

If you would like to be kept informed about the Macpherson Park Upgrade, please provide your contact details.

First Name: ________________________ Surname: ________________________
Email: ____________________________

Thank you for taking the time to fill out this survey.

<td>2014-10-10</td>
<td>1 hour</td>
<td>Walk</td>
<td>Playground equipment, roll down hill, fly kite, kick ball, roll around, blow bubbles, picnic, remote control cars, ride scooter and balance bike down little hill as grass softer for now, other general play with my toddler</td>
<td>Perimeter fencing to safely enjoy above activities, sun shade, see saw, more equipment, rubber concrete instead of sand or woodchips as dirty and have broken glass shards everywhere. Less tree near equipment due to space is adequate and does not warrant removal of the current play equipment. Moving playground closer to Arden St to utilise existing tree shade, which is not there for a majority of the day anyway, is shameful when not providing perimeter fencing, a garden buffer is ridiculously inadequate. Older age groups have been more than catered for in every other park in Waverley, none have enough for the hundreds of toddlers in the immediate area. It was quite unfair of the officers to dismiss the conclusion that there are clearly not many toddlers using this park judging by the turn out on 25.10.14. I have a full view of the park from my home and see every single day how many people and toddlers play at this park to warrant better and practical consideration. Access to the park is also more than adequate so should not outweigh the need to channel the money towards playground equipment and fencing for safety (instead). It would also be a shame to lose the picnic table and shade for no real reason.</td>
</tr>
<tr>
<td>2014-10-10</td>
<td>Monthly</td>
<td>30 mins</td>
<td>Varna Park facilities</td>
<td>Improved play equipment, catering to toddler, and preschool age groups. More玩耍 space, rock garden etc. Picnic and shelter area. Fenced play area and dog control - this is a current problem in Varna Park.</td>
</tr>
<tr>
<td>2014-10-28</td>
<td>Monthly</td>
<td>10 mins</td>
<td>Macpherson Street</td>
<td>Usually just walk along the path on Macpherson Street or get the bus from the stop on Macpherson Street. There should be a cross walk across Arden Street near Macpherson Street. This is a quite a dangerous street to cross as cars driving east along Macpherson Street turn right onto Arden Street without looking to see if pedestrians are crossing. Usually they drive around that corner really quickly because there are lots of cars already in that intersection. A cross walk would mean that we would walk along the Macpherson Street path next to a nice park, rather than deliberately cross the road to avoid that intersection. Please no more roundabout though, there are already too many of them when driving along Macpherson Street!</td>
</tr>
<tr>
<td>2014-10-29</td>
<td>Weekly</td>
<td>10 mins</td>
<td>Macpherson Street</td>
<td>I walk past the park to the beach daily, sometimes I go in to sit quietly. When our children were younger we would often stop on the way home from school as we live very close. Now our kids are older we don't use the playground area but I am deeply concerned about the speed and volume of traffic from Macpherson St going down Arden St. Crossing Arden Street is very scary and we have had several near misses. I am really worried about this especially as more children will be enticed into the park with a makeover.</td>
</tr>

</table>

**Appendix F**

1. A fenced and safer environment for the park is needed. It is close to our house and we love the location.
2. A space for children's play equipment is needed. There is a bake sale for the rollout of this project.
3. More play equipment and tables is needed. It's close to our house.
4. A more equipment, user friendly, safer environment is needed. It's close to our house.
5. A more equipment, user friendly, safer environment is needed. It's close to our house.
6. A more equipment, user friendly, safer environment is needed. It's close to our house.
7. A more equipment, user friendly, safer environment is needed. It's close to our house.
8. A more equipment, user friendly, safer environment is needed. It's close to our house.
9. A more equipment, user friendly, safer environment is needed. It's close to our house.
10. A more equipment, user friendly, safer environment is needed. It's close to our house.
11. A more equipment, user friendly, safer environment is needed. It's close to our house.
12. A more equipment, user friendly, safer environment is needed. It's close to our house.

### 2014-10-29 Weekly
09:38:00 UTC

10 mins Usually just walk along the path on Macpherson Street or get the bus from the stop on Macpherson Street.

There should be a cross walk across Arden Street near Macpherson Street.

<table>

</tr>
</thead>
</table>

This is quite a dangerous street for cars driving east along Macpherson Street turn right onto Arden Street without looking to see if pedestrians are crossing. Usually they drive around that corner really quickly because there are lots of cars already in that intersection.

A cross walk would mean that we would walk along the Macpherson Street path next to a nice path, rather than deliberately cross the road to avoid that intersection. Please no more roundabouts though, there are already too many of them when driving along Macpherson Street.

### 2014-11-01 Weekly
01:28:55 UTC

10 mins I walk past the park to beach daily, sometimes I go in to sit quietly. When our children were younger we would often stop on the way home from school as we live very close.

</table>

Now our kids are older we don't use the playground area but I am deeply concerned about the speed and volume of traffic from Macpherson St going down Arden St. Crossing Arden Street is very scary and we have saved several near misses. I am really worried about the exposure as more children will be enticed into the park with a makeover.

<td>31-40</td>
<td>Collect the newspaper and a coffee and then walk. I would like to see the playground upgraded with some equipment older children can play on. Our only reservation about park upgrade is the extra traffic it would bring to Baglin St. I think the park side of Baglin St should all be made 'No Parking' as it is often hard for drivers to drive through Baglin St cars are parked on both sides. I also think consideration should be given to marking the other side of Baglin St 1 hour parking for non-residents. There’s no doubt that an up-grade will bring more cars and this needs to be addressed.</td>
